JULY 2018

AKHTER COMPUTERS LTD ARE NOW APPROVED SUPPLIERS ON THE

G-CLOUD 10 DIGITAL MARKETPLACE

Akhter Computers Ltd are proud to announce that they have been recently selected as an approved supplier on the G Cloud 10 Digital Marketplace and are pleased to confirm their continued presence on the upgraded G-Cloud 10 Framework. which represents the UK governments' drive to encourage the strategic use of cloud technology by allowing buyers to access transparent and cost-effective cloud services and suppliers.

What is G-Cloud?

The G-Cloud is a UK government framework that helps to simplify the public-sector procurement process through a pre-approved list of suppliers and technologies on the UK Government Digital Marketplace portal. This initiative represents the UK governments' drive to encourage the strategic use of cloud technology by allowing buyers to access transparent and cost-effective cloud services and suppliers.

The G-Cloud 10 framework can be used by organisations across the UK public sector including central government, local government, health, education, administrations, emergency services, defence and not-for-profit organisations.

What does this recent announcement mean and how does this benefit the Public Sector?

The overall aim of the G-Cloud is to:

- Help public bodies easily research and evaluate cloud computing technologies and services for rapid and informed cloud innovation
- Remove barriers for SME's within public sector procurement.
- Ensure clients have access to the most competitive deals through competitive tender and regular benchmarking, the CCS

UK Public sector organisations can access an online collection of government authorised suppliers which helps them avoid the lengthy tender process involved with individual procurement, for Akhter Computers new clients, this will help provide a faster and quicker way for implementation along with the confidence that the service has been qualified by the Crown Commercial Service (CCS).

CEO Humayun Mughal recently said, *" We are delighted to announce that we have been successfully awarded a place on the G-Cloud 10 framework, which allows us to continue delivering our services as a Crown Commercial Service supplier*

The G-Cloud framework is a great opportunity for the public sector to take advantage of the many benefits of cloud computing. Being an approved G-Cloud supplier means that Akhter Computers can continue to offer cloud expertise to the public sector , making it easier for the buyers to access these cloud services through the transparent Digital Marketplace."

As a company we look forward to building new relationships with new clients through this easy access marketplace and with our extensive experience in procurements, our team are here to help with any queries about tenders and purchasing from the frameworks "

Now live on the Digital Marketplace, Akhter Computers Ltd offers services in categories as follows:
